

ATLANTA
PAVING & CONCRETE
CONSTRUCTION INC.

OFFICE OF THE PRESIDENT

Dear Potential Client,

My name is Ernest T. Lopez III, and I am the President and Chief Executive Officer of Atlanta Paving & Concrete Construction, Inc. (APCC). APCC is one of the premier world-class paving, milling, grading, stabilization, sealing and striping, full-depth reclamation, and concrete company that tackles the toughest jobs. In fact, we seek "Any job, Any place, Any time; Bar none".

We are a family owned enterprise and have been serving communities near and far for over 21 years. We have state-of-the-art equipment and are constantly upgrading and utilizing new technologies to stay ahead of the competition. We currently own over 200 pieces of equipment; which range from Wirtgen Milling and Stabilization machines, Pavers, Graders and a fleet of Dump Trucks and Transport trucks, to Drones and Global Positioning Systems to keep materials and equipment moving efficiently. Although we seek out new technology and equipment, we never forget that the most important differentiator in our business is our people.

During the 2007 – 2009 recession, and several years thereafter; we did not lay off a single employee. We sold property, equipment, and other assets to pay our crews rather than put a member of one of our teams out of work. Seldom do we lose an employee because of our loyalty to our teams and never a customer because of the quality of our work. In fact, our company motto is "Where Quality Still Counts". Employee loyalty is why we can guarantee our work and final product.

APCC completed more than 800 projects last year in 275 cities and 26 states across the United States. From highways and roadways to airports, truck and RV terminals, apartment complexes, shopping centers, condominiums and residential needs, we offer customized solutions to your complex needs. Please call; I am Ernie; and I will return your call within 24 hours. When you call: we visit, estimate, send crews, finish, and depart faster than you can say Atlanta Paving & Concrete Construction, Incorporated (Weather permitting of course). Please contact (770) 220-0228.

Until I hear from you, I remain

Respectfully yours,

Ernest T. Lopez III
